

2027 ITS World Congress Birmingham – POSTER SESSIONS

Review Procedure

External, independent and highly qualified reviewers will award a score and comment on the posters submitted on time and in the specified format using these criteria:

- **Relevance to ITS and the Congress programme:** The contribution should address an ITS-related topic mentioned in the Call for Contributions and demonstrate clear relevance to the themes and objectives of the ITS World Congress.
- **Innovation and originality:** The poster should present a new idea, approach, application, finding, experience or perspective, or provide a novel contribution to an existing ITS challenge.
- **Technical, scientific, or practical value:** The contribution should provide meaningful technical, scientific, operational, policy or practical insights that can be of value to Congress participants.
- **Clarity and quality of the contribution:** The objectives, approach, results, experience or key messages should be clearly described and sufficiently developed to support meaningful discussion.
- **Evidence and substantiation:** Where appropriate, claims and conclusions should be supported by research, data, evaluation results, practical experience, demonstrations or other relevant evidence. Preliminary results are acceptable where the contribution clearly explains the status of the work.
- **Potential for discussion and knowledge exchange:** Preference may be given to contributions that can stimulate interaction, discussion and exchange between the author(s) and Congress participants.
